DETAILED ACTION

1. This is the First Office Action on the Merits from the examiner in charge of this application.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 2, and 8-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 2, "means for attaching the is at least one fastener" is improper in context, thus indefinite. Claim 8, (1) the limitation "four panel covers each affixed to a non-panel element forming a four-sided frame" is vague, thus indefinite for failing to clearly define what would be considered as "a non-panel element", and how the four panel covers forming a four-sided frame. Claim 9, line 2, the recitation "group of" is of improper Markush-type; it should be "group consisting of".

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by USP 5,888,114 to Slocum et al.

Slocum et al discloses a snap together modular storage system comprising all the elements recited in the above listed claims including, such as shown in Figs 59-73, (1) a plurality of members each with four edges, four corners, a front side and a back side; (2) panel covers each having alternating plastic latches and catches with “deformable” slot walls, an alignment stop formed as part of each latches, means for attaching one or more elongated member to the corner panel cover, such as shown in Figs 62-73, said means for attaching is one of a fastener, an elongated member cavity, a mounting plate and a mounting guide having a cavity therein. In regard to the “whereby” clause, it has been held that the functional “whereby” statement does not define any structure and accordingly cannot serve to distinguish. *In re Mason*, 114 USPQ 127, 22 CCPA 937 (1957).

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hanh V. Tran whose telephone number is (703) 308-6302. The examiner can normally be reached on Monday-Thursday, and alternate Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner’s supervisor, Lanna Mai can be reached on (703) 308-2486. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
